POSTER PRESENTATION

Academic Excellence Through Research Activities - Poster /Paper Presentation

WHY SFGC GIVES IMPORTANCE TO RESEARCH ACTIVITIES?

Research is the most valuable tool in exploring new knowledge which can be gainfully harnessed in the overall development of the individuals along with an institution. For this specific purpose, SFGC has taken a lead in creating a Research forum for exploring the creative ideas of the faculty and students on a wide range of topics, which are of great importance to the society and the economy, at the very basic Undergraduate Level.

Motto: It is the need of the hour for students to explore and experiment themselves:

The deliberations to inculcate the involvement in the Research activity in the youth will be of substantial academic value to the students in exploring the new ideas and concept by experimenting themselves. The need for regular up-gradation and updating of knowledge in the present fast changing economic and political environment cannot be minimized or ignored. The ability to surf the giant waves of change, and not to be drowned is something that must be conscientiously learned and practiced with the active involvement in the research activities by faculty and the students.

How is Research encouraged in students in SFGC?

Research is an uphill task which is done in a very austere manner, taking care of the minute details, to prepare the student to participate in the research work. It is achieved by organizing National and International level Research Conferences and Competitions in SFGC.

1. Under the Guidance of Faculty:

Research is encouraged in the students at a very initial stage i.e. the First semester by the faculty members to further enhance and enrich knowledge on dynamism through stimulations of cross- disciplinary and cross academic-practical sharing and discussions in the form of Poster/ Paper Presentations. In any such research work the potential of the young mind is used in the very pure or original form and is guided by the faculty in exploring the new theories on the topics which may not have been discovered earlier.

2. Role of an institution in Research work:

It is very important for the institutions to bridge the ever widening gap between the theory and practice of teaching — learning, which can be applied in the real world situations with success. For this SFGC gives the training to its students to explore and experiment themselves and draw their own conclusion for anything. Undoubtedly, the wealth of knowledge generated from any kind of research activity, which results in immense academic value can be applied anywhere.

SFGC provides a golden platform for students to present poster on various Interdisciplinary topics at International conference. This research carried by them will be published with the ISBN no.

"In my view, greatness requires three things: wonderful students enjoying a tremendous student experience; very successful faculty; and a supportive campus learning environment".

This institution was the great forum - it nurtured my aspirations and laid the foundations to realize those aspirations through wonderful Faculties who in turn focused not only on the academics but also on career enhancements along with the extracurricular activities.
