Science is the systematic knowledge of natural or physical phenomenon. We live in an age of Science. Perhaps men have more faith in Science today than Greeks had on their Gods in ancient times. To an ignorant man, Science is deity who performs astounding deeds ; to a wise man it is a maid servant who acts according to his will and to an ordinary man, it is a wonder of wonders. Science plays a great role in our life today, it has completely changed our outlook and ways of life. Science helps us and stands at our command in every sphere of our activities. Nowadays nothing can be done without Science.

Science has enabled man to conquer the forces of nature, for instance, Science has provided very swift means of travel and communications. The steam engine, the motor car now, The aeroplane have almost annihilated time and space. Today man can fly like bird and swim like fish in the sea. The wonderful invention of wireless telegraphy helps us to send messages in a blink of an eye from one corner of the world to another. The value of wireless is best seen at the time of trouble. Wireless has led to the use of the radio, which is quickly becoming a means of education. Of late, further improvement known as television has been made the radio brings us only the voice of the people but the television enables us to see these people on the screen as well.

The greatest boon that Science has given is electricity, it not only furnishes light but also drive machineries to make man's life comfortable as well as luxurious. Inventions and discoveries of Science have also revolutionized Agriculture, Industries, and Education. Science equally manifested in the field of medicine and surgery, the discovery of X-Ray, MRI are more dependable diagnosis. These are some of the Glories of Science and Scientists are the Backbone of modern civilization.

Q.P. Code : 33101
